Quippo Telecom connects IGI Airport's upcoming Terminal 3

Fiber based active shared in-building solutions

Quippo Telecom Infrastructure Ltd. (QTEL) has added another feather to its cap by winning the tender from Delhi International Airport (DIAL) for Neutral Host Shared In-Building Communication Solutions at IGI Airport's upcoming Terminal 3 (T3). Quippo has introduced Extensive In-Building Solution for this prestigious project. The solution will be an active fiber-based technology and is the first of its kind in the Indian telecom industry for Wireless Coverage (WLAN, CDMA & LTE).

Delhi's India Gandhi International Airport (IGI) is undergoing a major reconstruction. Under the responsibility of Delhi International Airport (DIAL), the airport is being modernized with the addition of new terminals, runways and other passenger convenience infrastructure. The airport with a traffic throughput of 20 million (2000000) passengers is the second busiest airport in the country. The next important step in the modernization of this is the construction of new integrated passenger Terminal 3 (T3) which will be ready before the Delhi Commonwealth Games 2010. The phase will have a total project value of INR 9000 crore (1.92 billion), which would enable Delhi airport to build its capacity to handle 6000000 pax.

To provide high speed connectivity to the passengers, DIAL chose to partner with QTEL and Ericsson. QTEL's extensive professional and customer management strategy through its 900+ network offices shared in-building solutions for CDMA, CDMA, LTE, Wi-Fi and 4G/LTE technologies. The reason is to cater to the customer need of these in-class infrastructure for growing demand of being connected. The common shared solution will enable all operators to enhance their coverage and capacity in shared infrastructure.

On this occasion, Arun Kataria, Managing Director-Quippo Telecom, said, "We are very excited to be associated with the first Neutral Host Network Solution project in this space in India and we will give the best of our solutions to our valued users." He further added, "We at Quippo are committed to become true strategic and

growth partners of the service providers bringing unparalleled benefits of capital, state-of-the-art technology and the highest service standards. Quippo aims to become a true infrastructure partner in the telecom world." Quippo, operating as Infrastructure Equipment Rental Company, covering the high-growth markets of construction, oil and gas, telecom and energy. QTEL is the pioneer in India in the Shared Passive Telecom Infrastructure industry. Earlier this year, QTEL announced its partnership with Tata Telecommunications Ltd. (TTL) with the merger of their passive infrastructure business.

Commenting on the win, Geetika Sahasrab, Head Finance Delhi and Haryana, said, "This ground breaking project is not just a challenging opportunity for the telecom world with strong credibility in designing extensive communication systems to demonstrate our globally proven technology expertise in designing extensive in-building systems. We are pleased to have been chosen by DIAL for designing and commissioning its first generation communication system that will be a critical solution to their customer to become a globally reputed airport." Extensive in the world's leading providers of technology and services to telecom operators. Ericsson is the leader in 3G, 4G and 4G mobile technologies, and provides support for service providers to deliver solutions and for a leading position in managed services.
