

facilities will augment the construction equipment production from 22,000 units at present to 60,000 units by next 2 years which will increase their global market share, and will consolidate their after sales support system.

This plan will be implemented in tandem with their current Indian operation and Hyundai Construction Equipment India will be boosted with new product offering of customer's latest need.

Quippo Offers new Rotary Piling Rig for the First Time

Quippo Infrastructure Equipment Limited (QIEL), country's largest equipment rental company, announced its newly acquired Rotary Piling Rig for infrastructural development. QIEL has started the operations of this rig by lending it to Tantia Construction Ltd. (TCL) in Kolkata who very recently won the project for constructing a prestigious 1117 mtr long flyover at Salt Lake-Rajarhat Bye pass. The principal client of the project is KMDA (Kolkata Metropolitan Development Authority). This flyover is to facilitate movement of vehicular traffic in the area. At present approx. maximum traffic density is 300 vehicles per hour one way during peak hours.

This Rotary Piling Rig can work at a depth of 40 mtrs. with a radius of 2000 mm and can drill any type of ground with different drilling techniques and is developed with the help of a CAD system. Also to facilitate the counterweight and all the parts of the rig, it is positioned in a manner to guarantee maximum stability to the machine.

Speaking on the occasion Mr. Philippe Clover, President-QIEL, said, "We are very excited to have this new Rig as this strengthens to our fleet of unmatched range of infrastructure equipment." He further added, "With our aim to aid the

growth and development of infrastructure in the country this rig will take a step further in ensuring that we achieve our goals."

QIEL is planning to bring more such equipment in Kolkata because they believe this city should not be deprived from the advantage of this highly sophisticated and multi-utility equipment. Quippo's piling rigs are also engaged in other prestigious projects across the nation. Some of these projects include Delhi Metro Rail Corporation (DMRC)-Delhi, Bangalore Metro Rail Corporation-Bangalore, Bangalore Elevated Highway Project-Bangalore, Pipava Shipyard-Gujarat, Railways Overhead Bridges-Rajasthan, and so on.

QIEL currently has its presence in verticals of Construction, Mining, Oil & Gas, Telecom, Energy and Asset Valuation & Auctioneering. Quippo provides innovative world-class infrastructure equipment solutions to its customers. The company has a distinction of becoming the largest and undisputable leader in equipment rental in the country.

TIL Plans Greenfield Expansion

Infrastructure Company TIL Ltd, previously Tractor India, has decided to set up a Greenfield plant in West Bengal. The plant will produce components for Germany-based crane manufacturer Grove Worldwide. In the first phase, the cost of the plant would be around Rs 200 crore. The plant will cater to both domestic and export market. The company is in the process of raising funds to finance the expansion plan. We hope to commence production in the new plant by first quarter of 2009, said TIL, Vice-chairman S. Mujamdar.

JCB Adds its new State-of-the-art Dealer Facilities

As per its plan to expand its national presence JCB India Ltd.

announced the opening of its dealership in Aurangabad, Ratnappabbha Motors and in Pune, Siddharth Auto Engineers Pvt. Ltd. The dealership facilities are fully equipped with international standard servicing for JCB customers.

These two ultra modern facilities will provide services to customers in and around Aurangabad and Pune. The dealership infrastructure has been made as per the JCB Corporate Identity norms and is equipped with JCB standardized systems to provide a one-stop solution for JCB customers under one roof.

Inaugurating these facilities Mr. Vipin Sondhi, MD & CEO, JCB India said, "JCB stands for world-class earthmoving equipment. Its machines have always performed to the hilt and given top most satisfaction to its customers. We are sure that these state-of-the-art dealer facilities built by our dealers in Aurangabad and in Pune will help provide even better service to our valued customers. JCB, in its endeavor to provide world-class earthmoving equipment and machines, has always put the satisfaction of its customers at the top."

JCB India holds a leading position in the country and is the market leader in the Backhoe Loader segment, holding a major share of the market. Showing its commitment to the Indian market, JCB India is also gaining strength in the Tracked Excavator and the Wheeled Loading Shovel segment all over India.
